(54) Title: ELECTRONIC DEVICE, COMPUTER PROGRAM PRODUCT AND METHOD OF MANAGING APPLICATION WINDOWS

A

B

WO 2005/091123 A1

(57) Abstract: A method of managing application windows in an electronic device, an electronic device, and a computer program product. The electronic device comprises a processing unit for controlling functions of the device, a display connected to the processing unit for showing application windows, and an input device for issuing control commands, the processing means being configured to open the application windows of at least two different application programs onto the display. The processing unit is configured to indicate activation of a grip area for managing application windows on the display, detect a change in the location of the activated grip area on the display, indicated by an input device, and change the size of at least two application windows on the basis of the change in the location of the grip area.
